

# CAPITAL BANK OF JORDAN

We initiate on the fast-growing bank backed by PIF with a BUY on several growth levers

- CAPL is well positioned to grow its retail and corporate market shares in Jordan and Iraq after two attractive acquisitions, i.e., Bank Audi in Jordan and Iraq (2021) and Société Générale Jordan (end Q1 22), amplified by the digital banking window (Blink) that will fully digitalize Capital Bank Group. Further upside comes from a large unbanked population in Iraq (75%) and Jordan (50%) for the digital strategy.
- Growth is further amplified by geographical expansion into Saudi and UAE (DIFC).
- PIF has entered as a strategic investor with a 24% shareholding, bolstering capital by JOD 131m and 3.6% of RWAs, while it also placed an ADT1 bond at 7% of USD 100m (2.0% of RWAs) in Q1 22. Together with a high organic capital generation (RoE of c20% (target > 14%), the low double-digit B/S CAGR should largely be self-funded and cater for a payout of c.40-50% and a DY of 5.9%.

**Double-digit balance sheet growth (CAGR 22-25e of > 10%) on domestic and regional expansion.** The group has bolstered its lending and deposits market shares in Jordan (86% of assets, 64% of NOI) and Iraq (13% of assets, 29% of NOI) in 2021 through the acquisition of Bank Audi, raising assets by 23%, while the purchase of Société Générale Jordan (SGBJ) in Q1 22 added a further 25%. Both acquisitions were bought at a discount to the adjusted Net Asset Value. Further growth in the MT/LT should stem from trade finance following the establishment of National Bank of Iraq's (NBI) first branch in Saudi Arabia, benefitting from the increasing trade volumes between the two countries, and capitalizing on the strategic partnership with PIF through its recent 23.97% stake. The group's subsidiary in DIFC will accelerate the growth of capital investments (AuMs: USD 550m, 7% NOI contribution), supporting the growth in the two local markets. Finally, we also expect further acquisitions given the strong capital base, which could further enhance digital capabilities and existing market positions. The bank should benefit from its expanding branch network and ongoing digitization in under-penetrated markets.

**Room to further increase RoE on increased efficiency with C/I reduction of 21ppt.** The group expanded its parent RoE to 19.7% including one-offs in 2021 (11.5% excluding one offs), more than 2x the peers' average of 7.3% last year. CAPL targets to increase total assets by > 10% per annum, reduce the C/I from 53% to 43%, a RoE of > 14%, and a payout of c.50%. The non-funded income generation should continue from the expanding investment banking arm. We expect parent RoTE expansion of c. 12.0ppt in the next five years (adjusted for the one-offs in FY21) with a net income 5Y CAGR of 15.6% (25% with FY21 adjusted for the one-off gains on bargain M&A).

**NIM expansion to start in H2 on higher rates in Jordan.** The impact of higher rates has yet to filter through. CAPL expects NIM to expand following the cumulative rate hike on the prime rate of 2% from 2.50% to 4.50% in Jordan. The bank benefits from a corporate lending share of 60%, however, only 39% and 28% of total the loan and investment books, respectively, re-price in the next 12 months. We see room to improve the deposit mix further, with current accounts now only 23% of outstanding deposit balances (and CASA at 30%) as it invests in its digital capabilities and product offerings. Retail deposits are 48%, SMEs 7%, corporate 29%, and government 17%.

**Capital ratios bolstered in Q2.** Capital ratios have been supported by the JOD 131m capital injection by PIF during Q2 (3.6% of RWAs) and the ADT1 capital notes of USD 100m in Q1 (2.0% of RWAs), which increased CAR to 15.8%, Tier-1 to 14.8% and CET1 to 12.3%, fully absorbing the increase in RWAs from USD 3.2bn to 5.1bn Ytd, largely due to acquisition effects. Meanwhile, liquidity is strong, with LtD and LCR ratios of 75% and 168%, respectively, with the investment book of USD 2.5bn invested in liquid assets (15% of assets) and government securities (30% of assets), and loans at only 48% of total assets.

**Operating efficiency to improve on the back of digital transformation and cost synergies from acquisitions.** The bank targets reducing the C/I ratio to <43%, having averaged c. 51% in the past 5 years. The group recently launched the first digital bank in Jordan, Blink, while planning to introduce it also in Iraq in H2 22, which should position it well to tap into the largely unbanked young population.

**Healthy asset quality, backed by c. 50% collateralization of overall exposure and a diversified lending base.** Stage 1 loans make up 81.4% of total book (vs. 82.4% YE 21) with a coverage of 0.68% (vs. 0.65% YE 21A). Stage 2 and 3 loans stand at 9.9% and 8.8%, respectively, compared to 9.3% and 8.4% YE 21A, demonstrating a stronger improvement vs Q1 22, with corresponding coverage of 6.3% and 49.2% as of Q2 22 compared to 4.0% and 55.1% YE 21A, leading to a provision deficit of 1.8% of loans on our acid test (1% of stage 1, 12% stage 2 and 60% stage 3). However, the collateral position is strong and stage 1 coverage is ahead of the expected CoR (management targets 55bps) for the next few years.

**Premium valuation warranted by superior returns and growth outlook.** The bank is trading at P/NAV 22 and P/E 22 of 1.3x and 7.4x, while offering RoTE 22e of 21% vs. sector average of 0.8x, 11.8x and 7.3%, respectively. However, the DY of 5.9% is slightly behind the sector of 6.1%. RoE is set to expand further on > 10% B/S growth and a further reduction in C/I to below 43%, on geographical expansion through acquisitions, digitization initiatives, and improving financial inclusion in Iraq and Jordan. We initiate with a BUY rating and a TP of 3.90, offering 54% upside.

## Geographical expansion at the heart of the business model

- Business growth has been supported by a stronger foothold domestically and abroad as Capital Bank increased market share through two major acquisitions, i.e., Bank Audi in Jordan and Iraq (Q1 21) and Société Générale – Jordan (end of Q1 22).
- Regional presence has been extended to Saudi Arabia through the establishment of an NBI's branch, with further support stemming from the strategic partnership with PIF, currently owning 23.79% of Capital Bank. Presence in UAE has been established through its Capital Investment subsidiary. Geographical expansion is key for Capital Bank to reach its guidance of total asset CAGR of >10% for 2022-2025.
- Well diversified business model, with a contribution to revenue stream emanating from the following segments: i) institutional banking, ii) consumer banking, and iii) treasury, investment, and financial institutions.
- Digitization initiatives are key to the bank's strategy in improving operating efficiency, i.e., launch of Blink, a digital bank, in the Jordanian market, with Capital Bank aiming to reduce C/I to below the 43% threshold. This is likely to be supported by the cost synergies emanating from the ongoing acquisitions. Capital Bank targets RoE >14%.

**Capital Bank managed to cement its leadership domestically and in the Iraqi market** through significant acquisitions, in line with its expansion strategy. Key recent acquisitions and geographical expansions include:

- Bank Audi in Jordan and Iraq in March 2021**, raising the number of branches in Jordan to 22, and 19 in Iraq (through National Bank of Iraq – NBI), lifting the bank's loans and deposits market share by 1.2 and 1.7ppt, respectively, in Jordan, and by 1.0 and 0.8ppt in Iraq, and increasing the group's asset base by 23% in FY 21.
- Société Générale Jordan (SGBJ) in March 2022**, with 20 branches operating under its name. The acquisition results in adding JD 1.5bn in assets (23% of total assets as of Q2 22A), expanding the network by 19 branches, and increasing the customer base by 35k.
- The establishment of an NBI's branch in Saudi Arabia** to take advantage of the trade volume between the two countries, through the facilitation of commercial operations while raising the group's capability to meet client needs, especially export companies.
- The presence in DIFC through the group's subsidiary Capital Investments Limited** provides a platform linking its clients in Jordan and Iraq with investment opportunities and projects. The subsidiary is an excellent source of fee income stream through investment services, including asset management, corporate finance, and advisory. Capital Investments (DIFC) aims to expand and increase its product offerings, mainly through the Asset Management segment, having obtained the license in 2021, Capital Select and Wealth teams.
- Capital Bank of Jordan announced the launch of digital bank Blink in Q1 22**, the first truly digital bank in Jordan following global best practices, reinforcing the group's digital transformation acquisition strategy targeting the age group 18 to 40, and **focused on unsecured lending**.

**Further expansion lies ahead, with the bank recently strengthening its capital base** through the issuance of a USD 100m in perpetual additional tier 1 bonds (7.1% coupon) in Q1, before the Russian-Ukrainian conflict, and the JOD 131m capital injection by PIF in Q2 22, marking a pickup in PIF's investments in Jordan following a slow start in 2017 with the establishment of the Saudi Jordanian Fund. The investment highlights the bank's growth prospects and builds on its proven track record in the Jordanian market. Having PIF as a strategic partner positions CAPL very well for upcoming projects, particularly for ones backed by PIF itself, i.e., i) MoU signing between the Jordan Investment Fund and the Saudi Jordanian Investment Fund (SJIF) to explore the opportunity of investing in the National Railway Network Project, and ii) Agreement signing between SJIF and Jordan to invest \$400m in a domestic healthcare facility.

## Business segments

Capital Bank of Jordan's revenue generation stems from the following segments:

### Institutional Banking

The institutional banking segment is divided into: Corporate Banking, SMEs, and Commercial Banking.

Under corporate banking, Capital bank focuses on financing sectors funded by the Central Bank of Jordan, such as tourism, agriculture, information technology, renewable energy, and industry.

Capital Bank continues to focus on financing SMEs, which currently make up 10% of the total loan book, being one of the main drivers of the national economy, providing most job opportunities and contributing to economic growth.

### Consumer Banking Department

Key achievements in 2021 include:

- Implementation of a new customer-oriented operating model
- Providing advanced investment and banking solutions through three centers
- Introduction of new deposit products and savings accounts packages
- Launch of a virtual credit card, Bills and More, to pay bills and make transfers without commissions through the bank's app
- Activation of the Pepper smart robot service that acts as a personal assistant for customers

### Treasury, Investment and Financial Institutions Department

Key activities include:

- Investing in i) sovereign Jordanian debt instruments, and ii) debt instruments issued by domestic and international companies with high solvency and credit worthiness.
- Contributing to local, regional, and international high-growth companies.
- Investing in mutual funds.
- Investing in structured securities within the bank's needs.
- Managing the bank's foreign exchange positions.
- Managing the bank's assets and liabilities in dinars and various foreign currencies.

#### Exhibit 8: Group medium-term guidance (2022-25)

Metric	Guidance (2022-25)	Management Comments
Total Assets	CAGR > 10%	Total Assets > USD 6.3bn
Cost to Income Ratio	<43%	Improve efficiency and implement further cost saving policies
RoE	>14%	Maintain double digit ROE starting 2021 onwards
Capital Adequacy	>14% (Consolidated)	Strong Capital base, maintained well above minimum requirements
Dividends	DPO of c. 50%	Target a stable payout ratio for shareholders

Source: Company Data

## Strong acquisition track record – two landmark acquisitions

### Acquisition of Bank Audi Branches in Jordan and Iraq in Q1 21 – at a 40% discount to BV

During September 2020, the Group signed a letter of intent to acquire the banking business of the Lebanese Bank Audi branches in Jordan and Iraq. At the end of December 2020, the bank signed an agreement to purchase and transfer the business. The bank was bought at a bad will of JOD 28m, which resulted in a one-off P/L gain of almost JOD 25.4m after fees. The acquisition materially improved its market shares in Jordan and Iraq. It paid JOD 41.8, well below the adjusted Net Asset Value of JOD 69.9, leading to a one-off gain of 25.4 after transaction costs of JOD 2.7m. It paid 9.2x/5.2 trailing FY20/19A earnings. A 20% cost reduction would have resulted in JOD 2.5m in annual savings, or 3.5% of the group's OpEx and 1.8ppt impact on the C/I for FY21.

#### Exhibit 9: Net fair division of assets and liabilities acquired on March 11, 2021

### Acquisition of Société Générale Bank branches in Jordan (end of Q1 22) at a 16% discount to Book Value

In February 2022, the Group signed a Letter of Intent to acquire the banking business of Société Générale Bank branches in Jordan. By the end of Q2 22, the bank acquired almost all shares of Société Générale Bank, which inflated the group balance sheet, while once again, it realized a one-off P/L gain of JOD 26.3m on the bargain purchase. It contributed to recurring revenues and income for the first time in Q2 22. It paid 13.8x trailing FY21A earnings when adjusted for 20% cost synergies.

CAPL expects to reduce the cost base of SGBJ by 20%, while it should bolster the gross income by 12%. In addition, it has identified financial synergies (lowering CoF). The acquisition should also strengthen the blended NIM, as CAPL optimizes SGBJ's CoF.

#### Exhibit 15: Net fair division of assets and liabilities acquired on March 31, 2022 (JD '000)

	SGBJ Q1 22	% CAPL - 2021
Cash and balances with banks and central banks	435,182	58.9%

## Rebound in key economies with increased financial inclusion

- We pencil in 60% growth in 2022 in the loan book mainly following SGBJ acquisition, and increased credit demand in Jordan and Iraq, with GDP growth forecasted to reach 2.1% and 8.8%, respectively, as per the WB, and continued market share gains.
- Further boost should stem from the presence in Saudi Arabia and the DIFC.
- Meanwhile, loan book expansion in 2022 is boosted by the acquisition of SGBJ, contributing to 24% growth during Q1.

The bank should be able to capitalize on its expanding footprint following the series of acquisitions (i.e., Audi and SGBJ) that lifted its number of branches from 13 YE 20 to 45 in Jordan and 14 to 19 in Iraq. Finally, the bank should benefit from the improving macro on the back of its corporate-oriented loan book with a current share of c.60% of the total book, of which 10% correspond to SME lending. SME exposure is likely to gradually increase as it remains at the heart of the Jordanian economy, accounting for >95% of local businesses, contributing to >50% of GDP, and employing c. 60% of labor market.

### Macro improvement in Jordan with 5 YR CDS remaining 350bps despite mid-single digit current and fiscal account deficits.

The World Bank forecasts a GDP growth of 2.1% (vs. 2.4% by the IMF) for Jordan, with the country managing to mitigate the impact of higher commodities and fuel prices with LT energy deals and a decent stockpile of wheat. The economy has also been supported by a rebound in tourism, remittances, and higher exports of fertilizers. Inflation is expected to settle around 3.8% in FY 22e according to forecasts of the central bank of Jordan, compared to an average inflation of 2.3% and 4.4% in Q1/ Q2 this year, nonetheless contained relative to global peers, minimizing the inflation-driven impact on consumer spending. Foreign currency reserves amounted to USD 16.8 billion as of Q2 22.

However, potential downside risks to Jordanian's economy stem from i) the elevated levels of unemployment at c. 23%, which requires supportive reforms that would spur investments, ii) the impact of tightening monetary policy given the mid-single digit external and fiscal deficits, and iii) increases in Debt/ GDP levels.

### Significant twin surpluses in Iraq

Iraq accounts for c. 20% of the group's total lending book. The World Bank pencils in a GDP growth of 8.8% on the back of rising oil prices, potentially leading to improvement in the non-oil GDP thanks to higher investments financed through the oil windfall, i.e., significant reconstruction and infrastructure projects, particularly in the healthcare, FMCG and education sectors. Furthermore, Iraq's favorable demography, with over 50% of the population falling in the working population, offers room for stronger credit demand and spending in the MT/LT. Credit demand is currently untapped given the low banking penetration across individuals and business with only around 25% of adults having bank accounts vs. 50% in Jordan.

Iraq's spike in poverty due to the COVID-19 pandemic put a heavy toll on its inflation number, which is expected to be reflected in 2022 in the wake of the exchange rate devaluation and proposed reduction in the public wage bill and pensions.

Foreign currency reserves amounted to USD 66.2 million as of March 2022, up from USD 62.9 million in 2021. The Iraqi banking sector is mostly controlled by state banks Rasheed Bank, Rafidain Bank and Trade Bank of Iraq.

As for Iraq's economy, risk stem from i) the delay in government formation and ratification of 2022 budget, which could limit the optimal usage of the oil-driven fiscal windfall, ii) intensifying geopolitical tensions, and iii) potential impact on Russian oil companies in Iraq by imposed sanctions.

Finally, the establishment of NBI's first branch in Saudi Arabia opens the door for significant trade finance deals in the MT/LT given the ongoing improvement of Saudi's macro benefitting from the higher oil prices as well, and the evolving healthy relations between Saudi and Iraq (room to improve trade deficit). Upside risk to GDP growth in Jordan and Iraq should stem from the Ukrainian-Russian deal allowing grain export, which is crucial to containing inflation.

## Capital injection by PIF and ADT1 welcome, absorbing RWAs growth from acquisitions and supporting CAPL's expansion strategy and digital transformation plans

- Capital ratios have been supported by the JOD 131m capital injection by PIF (at JOD 2.08/share or 11% premium to BVps) during Q2 (3.7% of RWAs) and the ADT1 capital notes of USD 100m in Q1 (2.0% of RWAs).
- This has increased CAR to 15.8%, Tier-1 to 14.8% and CET1 to 14.3% from 14.9% and 13.2% YE 21A. The capital increase absorbs the increase in RWAs from USD 3.2bn to 5.1bn YtD, primarily due to acquisition effects.
- Liquidity is strong, with LtD and LCR ratios of 75% and 168%, respectively, with the investment book of USD 2.5bn invested in liquid assets (15% of assets) and government securities (30% of assets) with loans at only 48% of total assets.

## NIM expansion to start in H2 on higher rates following a contraction in H1 on faster re-pricing of liabilities

- The central bank of Jordan increased interest rates this year following the global monetary tightening, raising it by 25bps on 20 March 2022, 50bps on 8 May 2022, and 75bps on 31 July, hence offering support for banks' NIMs in the medium term.
- We expect NIM improvement in H2, following the contraction in H1 as liabilities repriced faster than the asset base, on the back of a corporate lending share of 60% of total book (including SMEs).
- CAPL also sees potential improvement in cost of funds (particularly of SGBL) with a wide room for increasing the bank's CA share, currently limited to 23% of the total book (vs. sector average of 26%).

**Delayed re-pricing on negative 12M ALM gap.** As of YE 21, the bank's reported a 12m ALM gap of -27% of total assets with 36% of assets re-pricing in 12m compared to 64% of liabilities, weighing as a result on H1 NIMs. Going forward, higher assets yields should be driven by the re-pricing of 39% of total loans in 12 months, with corporate lending making up for 60% of total book (of which 50% for large corporations and 10% for SMEs), while CoF should benefit from the optimization of SGBJ's product offerings.

Furthermore, the bank has room to improve its NIM by optimizing its funding mix with CA deposits that are limited to 23% of total book, slightly below peer's average.

**Exhibit 55: Higher interbank rates in-line following CB's cumulative rate hikes of 75bps in H1 22A**

## Higher operating efficiency ahead on the back of digitization and acquisition-related cost synergies

- Capital Bank continues to focus on improving operating efficiency through digitization initiatives, recently launching the first digital bank in Jordan, Blink, while benefitting as well from the acquisition's cost synergies.
- We expect a further drop in overall operating cost (OpEx/TA + CoF) on digitization materializes, having declined from 2019 peak of 6.2% to 4.8% in 2021.
- CAPL has identified 20% cost savings on the cost base of SGBJ, which results in JOD 4m in savings, and would reduce the group's C/I by 3ppt.
- Digitization is critical for credit growth as it targets young audience with age ranging from 18-40 years, hence enhancing revenue stream, and gradually reducing C/I ratio, to meet the bank's target of <43%. We expect it to undershoot its target in FY23e based on OpEx growth of 5% and over 10% asset growth.

**Digitization initiatives are at the core of the bank's strategy to improve efficiency.** CAPL continues to focus on digitization initiatives and the implementation of AI-enabled data management platforms to improve the bank's overall operating efficiency. The bank launched in February 2022 a digital bank, Blink, in the Jordanian market, catering to a younger audience, SMEs and home-based project owners, particularly women-owned businesses, and focusing on an ecosystem banking with unsecured lending. The bank plans to introduce Blink in the Iraqi banking market in H2 2022, which should help in absorb the credit demand from the predominantly young population.

### Implemented digital initiatives:

- Partnership with Liwwa, a Jordanian fintech company for SME lending, FX and commodity trading in Jordan and Iraq
- Collaboration with Zain and Asia Cell in Iraq for e-wallets and POS cash transactions
- Partnership with Codebase Technologies to launch Neo-Bank, a digital bank servicing individuals and SMEs.

**Exhibit 62: OpEx/ TA evolution – improvement to continue thanks to digitization**

## Asset quality to improve against a backdrop of a stable, healthier macro

- Capital Bank credit exposure is well diversified across a wide range of economic sectors, with the highest concentration in retail, commercial, and RE and construction (22%, 19% and 18%, respectively).
- Asset quality has improved in Q2, with stage 1 loans' share improving to 81.4% from 75.5% in Q1 (82.4% YE 21) with coverage of 0.7%, in-line with YE 21. Stage 2 fell to 9.9% from 15.4% in Q1 and stage 3 to 8.8% from 9.1% in Q1 22A. Stage 2 and 3 loans coverage stand at 6.3% and 49.2% compared to 5.4% and 50.7% in Q1 (4.0% and 55.1% YE 21A). We still calculate a provision deficit of 1.8% of total loans, slightly higher than YE's deficit of 1.4%, vs. our acid test (stage 1: 1%, stage 2: 12%, stage 3: 60%).
- The commercial and real estate sectors are the top contributors to stage 2 and 3 financial instruments: i) 33% as stage 2 commercial and 24% as stage 2 real estate, and ii) 32% as stage 3 real estate and 23% as stage 3 commercial.
- A healthy level of collateralization, reaching c. 50% of total credit exposure.

## Sector best RoE profile, to be further enhanced

- CAPL consistently reported higher RoE and RoA than peers.
- RoA is supported by higher non-funded income generation (non-NII/AA), slightly higher efficiency than peers (OpEx/ AA) and lower credit cost (provisions/AA).
- RoE 2021 was supported significantly by non-recurring income (JD 25m) stemming from the acquisition of Bank Audi, increasing by 6.8ppt reaching 16.3%. It was also aided by a more optimal equity multiplier of 11.0x vs. 8.4x for peers.

**Exhibit 90: RoRWA evolution – RoRWA in FY 21/22e is also impacted by acquisition results**

Source: Company Data, Arqaam Capital Research

## Premium valuation is warranted on high growth and RoE

- Higher valuation is warranted by stronger return generation, with CAPL consistently managing to report higher RoE than peers, with Group's RoE 21A of 9.5% (excl. acquisition impact) compared to sector's average of 6.8% and a target of >14%, which we expect the bank to exceed.
- Decent dividend yield provided by CAPL, albeit below peers' average (5.9% vs. 6.1%) in 2021, though should improve going forward as DPO improves back to historical level (5Y average of 60% vs. 38% in 2021).
- Our EVA model sets a TP of JD 3.9, offering 53.5% upside from CMP, including limited excess capital, and despite subtracting JOD for the provision deficit of JOD 42m (vs. our acid test).

## Q2 22 review – Strong earnings growth backed by significant balance sheet expansion spurred by acquisitions

- Strong set of results, with CAPL posting a profit of JD 18.5m in Q2 22A, up by 41.7% q/q when excluding acquisition results from Q1 22A, partly due to the acquisition of SGBL. Earnings growth on a y/y basis was driven by a significant balance sheet and topline expansion on the back of acquisitions and provision reversals.
- CAPL reported a sharp q/q improvement in asset quality, with stage 2 and 3 loans falling to 9.9% and 8.8%, respectively, from 15.4% and 9.1% in Q1 22A.
- NIM contracted by 1bps q/q and 61bps y/y due to unfavorable 12m ALM gap of -27.4% of total assets as of YE 21A.

**Strong earnings growth driven by significant balance sheet expansion amplified by M&A.** Operating income surged by 26.3% y/y in Q2 22A, on the back of i) higher topline, up by 39% y/y, on stronger NII (+40.7% y/y) backed by lending growth of 66% y/y and non-NII (+34.6% y/y) due to higher F&C (+41.1% y/y) and other income, and ii) provisions reversals (JD -0.8 vs. 8.2m in Q2 21A). This was partially offset by negative JAWs of -15% on higher OpEx (+54% y/y). Sequentially, earnings increased by 41.7%, albeit down by 52.1% q/q when including acquisition gains of JD 25.6m in Q1 22A. Note that SGBL was only consolidated by the end of Q1. Pre-provisioning profit increased by 11.8% y/y on a higher topline (+23.9%) due to stronger NII (+20.2% q/q) and non-NII (+35.5% q/q). H1 net profit surged by 38% y/y, leading to a RoE of 26.0% vs. 25.8% in H1 21A.

**NIM contraction on unfavorable 12M ALM gap.** We calculate NIM compression of 1bps q/q and 61bps y/y on the back of unfavorable 12M ALM gap of -27.4% of total assets, with 46% of total assets repricing in 2022 vs. 84% of total liabilities. Lower NIMs stemmed from higher CoF, up by 15bps y/y, on the back of a more expensive funding mix, with time deposits' share increasing from 62% YE 21A to 69% in Q2 22A, at the expense of lower CASA share, down from 37% YE 21A to 30% Q2 22A.

**Liabilities driven balance sheet boosted by recent acquisition of SGBJ in Q1.** Deposits outpaced loans YtD by 8.1%, yielding a lower LtD ratio of 72.4% vs. 76.3% YE 21A. Loan growth was broad based and was mainly funded via time deposits, up by 75.5% YtD. Main contributor to credit growth continues to be the large corporate segment, up by 63.8% YtD, followed by retail and mortgage segments, up by 30.2% and 79.2% YtD, respectively.

**Improvement in asset quality reflected through higher share of stage 1 loans.** Asset quality has improved in Q2, with stage 1 loans' share jumping to 81.4% from 75.5% in Q1 (82.4% YE 21) with coverage of 0.7%, in-line with YE 21, at the expense of lower stage 2 and 3 loans, with shares declining to 9.9% and 8.8%, respectively, from 15.4% and 9.1% in Q1 22A. Stage 2 and 3 loans coverage stand at 6.3% and 49.2% compared to 5.4% and 50.7% in Q1 (4.0% and 55.1% YE 21A). As a result, we calculate a provision deficit of 1.8% of total loans, slightly higher than YE's deficit of 1.4%.

**PIF injection in Q2 and issuance of ADT1 in Q1 strengthen the capital base.** Capital ratios have been supported by the JOD 131m capital injection by PIF (at JOD 2.08/share or 11% premium to BVps) during Q2 (3.7% of RWAs) and the ADT1 capital notes of USD 100m in Q1 (2.5% of RWAs). This has increased CAR to 15.8%, Tier-1 to 14.8% and CET1 to 14.3% from 14.9% and 13.2% YE 21A, despite the sharp increase in RWAs on organic growth and acquisition effects. Liquidity is strong, with LtD and LCR ratios of 75% and 168%, respectively, with the investment book of USD 2.5bn invested in liquid assets (15% of assets) and government securities (30% of assets) with loans at only 48% of total assets.

## ESG policies

- Capital Bank implements a regular Environmental & Social (“E&S”) performance assessment through an E&S board-approved policy based on IFC standards.
- The bank has fully integrated the E&S procedures pertaining to categorization, assessment, and monitoring into the credit approval system.
- Designated credit/front office staff members have received adequate E&S training through the IFC E-learning platform to enable them to report any E&S risk as part of their standard processing of transactions.
- According to Capital Bank’s E&S policy, Capital Bank categorizes its transactions based on exposure to E&S risk sectors, performs an analysis for relevant transactions to assess the identified risks, mitigates and manages risks associated to those transactions by identifying the problems and designing adequate solutions using IFC Standards.
- Capital Bank also monitors the E&S performance of clients through staff annual site visits and questionnaires.
- Capital Bank takes active measures to reduce its environment footprint through implementing waste, paper, and plastic recycling in partnership with local NGOs.

### **Published score by ESG Invest for 2019 (ESG has not published its scores for 2020 and 2021):**

- Integration of environmental factors in lending activities: 18/100
- Relationship with customers: 36/100
- Data privacy and security: 50/100
- Integration of social factors in lending activities: 0/100
- Prevention of money laundering/terrorism financing: 24/100
- Integration of ESG factors in Investment Activities: 0/100
- Board of Directors: 44/100

## Governance: all Board members are non-executive and 6 out of 13 are independent

### H.E. Mr. Bassem Al-Salem

#### Current Positions:

**Chairman of the Board of Directors of Capital Bank of Jordan** and chairman of the Board of the Jordanian Association of Banks. He is chairman of several boards of prominent private and public companies, most notably the Jordanian General Mining Company.

#### Experience:

Mr. Al-Salem began his career in the private sector, where he established several industrial companies. In April 2011, he became the chairman of the Board of Directors of Capital Bank Group, which includes the Jordanian Capital Bank, the National Bank of Iraq, and Capital Investments Brokerage-Jordan LTD. He is also one of the founders of Capital Bank of Jordan and has directed the bank to innovatively serve its clients, while focusing on providing advanced commercial and investment banking services to the Jordanian and Iraqi markets.

He previously held the posts of minister of labor and minister of finance in Jordan (2005-2009) and is credited for putting in place social and economic policies that contributed to the creation of job opportunities in the public and private sectors, in addition to attracting foreign companies and investments to Jordan and contributing to the growth and prosperity of local investments.

Previously, he held the position of the chairman of the Board of Kings Academy and the post of chairman of the Board of the Social Security Corporation (2005-2009), and he was a member of the Board of Directors of the Central Bank. He served as a member of the Jordanian Senate from 2010 to 2011.

#### Mr. Dawod M. D. Al Ghoul – Group CEO

Mr. Al Ghoul has worked for more than 22 years in financial and strategic planning, investments and financial restructuring. He began his career in 1995 as an auditor at Arthur Andersen in Dubai, UAE, and then at Schlumberger, Dubai as assistant financial director for MENA and the Indian subcontinent. He then moved to KPMG in Dallas, Texas, as a financial advisor in international taxation. In 2003, he joined the Arab Bank Group as vice chief financial officer. In 2008, he took over as executive vice president of planning and investment for the same group, during which time he led and developed the group's financial plans. In 2012, he took over the position of chief financial officer of the Arab Bank Group and later as CFO at Abu Dhabi Capital Group.

#### Yasser Ibrahim Mohammad Kleib – Group Chief Institutional Banking Officer

Mr. Kleib has over 20 years of experience in commercial and institutional development. He joined Capital Bank in 2004, and began his career in the Banking Services and Credit Facilitations Department. Previously, he worked at the Arab Bank for eight years.

#### Ali Mohammad Daoud Abu Swai – Group Chief Treasurer

Mr. Abu Swai has more than 24 years of experience in financial markets, banking, treasury, and investment operations. He served as the president of the Trade Association from 2010 until 2017, and is a member of the Board of Directors of the Investment Fund of the University of Jordan. He is Jordan's representative to the Arab Union of Circulators in Financial Markets and previously worked for Amman Investment Bank for five years.

**Manar Mohammad Abdulhalim Al-Nsour – Head of Financial Management**

Ms. Al-Nsour has close to 17 years of practical experience, having held various managerial positions at Capital Bank before she assumed the role of the Chief Financial Officer as of July 30, 2016.

**Falah Hassan Khalil Kokash – Head of Risk Management**

Mr. Kokash has over 21 years of experience in the financial sector. He has held several leadership positions in risk management and credit analysis and has worked for several banks including the Bank of Jordan, Ahli Bank, Istithmari Bank and Al-Bilad Bank in Saudi Arabia.

**Mohammad Hafez Abdul-Karim Mohammad Hafez Mua'z – Head of Legal Affairs**

Mr. Mua'z previously worked in the foreign section of the Arab Bank's Legal Department for two years. Prior to that, he worked at Dajani and Sons law firm for five years. He has been a member of the Jordanian Bar Association since 1997 and has been a member of the Association of International Lawyers since 1998.

**Ra'fat Abdullah Ismail Khalil – Head of Internal Auditing**

Mr. Khalil has over 26 years of practical experience, having worked at the Central Bank of Jordan for seven years. He also worked at Oman Commercial Bank for four years and at the Oman Arab Bank for seven years.

**Zain Ammar Khaldoun Malhas – CEO of BLINK**

Ms. Malhas has over 12 years of experience in the banking sector, having worked for the Housing Bank and Standard Chartered, where she managed the Global Subsidiaries business. Ms. Malhas is also a member of the board of directors Middle East Payment Services (MEPS).

**Haya Ibrahim Hanna Abuata – Head of Human Resources**

Ms. Abuata has around nine years of experience in the banking sector. She moved up the ranks in Capital Bank Jordan before becoming the head of human resources on August 12, 2020.

**Manar Nizar Mahmoud Aabidi – Head of Credit**

Ms. Aabidi has around 24 years of experience in the banking sector. Prior to Capital Bank, she worked with the Housing Bank, HSBC, and CitiBank, where she was the head of commercial banking and vice president.

**Mohammad Ragheb Hussein Othman – Head of Consumer Banking**

Mr. Othman has around 17 years of experience in the banking sector. He has worked with a number of banks, including the Arab Bank, Jordan Ahli Bank, and Al-Rajhi Bank, until he joined Bank Al Etihad, where his last post was chief retail banking officer.

**Touleen Mohammad Mahmoud Barto – Head of Marketing and Corporate Communications**

Ms. Barto has more than 24 years of experience in the field of marketing in the communications sector and joined Capital Bank as head of the Marketing and Corporate Communications Department. Previously, she worked at HSBC Bank for nearly two years.

**Izzedine Rushdi Abd Al-Latif Abu Salameh – Head of Operations**

Mr. Abu Salameh has more than 26 years of experience, 20 years of those in the banking sector. He held posts in several banks, including Standard Chartered Grindlays and Cairo Amman Bank, until he joined the Bank Al-Etihad, where he was chief operating officer.

**Samer Ibrahim Abd Al-Afou Al-Aloul – Head of Banking Operations**

Mr. Al-Aloul has nearly 22 years of experience in the banking sector. He worked in several banks, including CitiBank and Standard Chartered, until he joined Bank Audi, where he was deputy general manager. After Bank Audi's merger with Capital Bank, Mr. Al-Aloul assumed the post of head of banking operations.

**Mu'nes Mamdouh Hanna Haddadin – Head of Compliance**

Mr. Haddadin has more than 22 years of experience in the banking sector. He worked in several banks, including Bank Al-Etihad, the National Bank, and the Central Bank, until he joined the Royal Bank of Canada, where he was manager for Global Financial Crimes and Economic Sanctions Risk Assessment.

**Fadi Farid Habib Khouri – Head of Liabilities**

Mr. Khouri has nearly 25 years of experience in the banking sector. He worked in several banks, including the Arab Bank, ABC Bank, Jordan Commercial Bank, Standard Chartered Bank, and ANZ Grindlays Bank, until he joined Bank Audi, where he was retail and branch manager. After Bank Audi's merger with Capital Bank, Mr. Al-Aloul assumed the post of head of liabilities.

## Important Notice

### 1. Author, regulator and responsibility

Arqaam Capital Limited ("Arqaam") is incorporated in the Dubai International Financial Centre ("DIFC") and is authorised and regulated by the Dubai Financial Services Authority ("DFSA") to carry on financial services in and from the DIFC. Arqaam publishes and distributes (i.e. issues) all research.

Arqaam Capital Research Offshore s.a.l. is a specialist research centre in Beirut, Lebanon, which assists in the production of research issued by Arqaam.

### 2. Purpose

This document is provided for informational purposes only. Nothing contained in this document constitutes investment, legal, tax or other advice or guidance and should be disregarded when considering or making investment decisions. In preparing this document, Arqaam did not take into account the investment objectives, financial situation and particular needs of any particular person. Accordingly, before acting on this document, investors should independently evaluate the investments and strategies referred to herein and make their own determination of whether it is appropriate in light of their own financial circumstances and objectives.

### 3. Rating system

Arqaam investment research is based on the analysis of regional and country economics, industries and company fundamentals. Arqaam company research reflects a long-term (12-month) fair value target for a company or stock. The ratings bands are:

Buy	Total return >15%
Hold	0-15%
Sell	Total return <0%

In certain circumstances, ratings may differ from those implied by a fair value target using the criteria above. Arqaam policy is to maintain up-to-date fair value targets on the companies under its coverage, reflecting any material changes to the analyst's outlook on a company. Share price volatility may cause a stock to move outside the rating range implied by Arqaam's fair value target. Analysts may not necessarily change their ratings if this happens, but are expected to disclose the rationale behind their view to Arqaam clients.

### 4. Accuracy of information

The information contained in this document is based on current trade, statistical and other public information we consider reliable. We do not represent or warrant that such information is accurate or complete and it should not be relied upon as such. Any mention of market rumours has been derived from the markets and is not purported to be fact or reflect our opinions. Arqaam has no obligation to update, modify or amend this document or to otherwise notify a recipient thereof in the event that any opinion, forecast or estimate set forth herein, changes or subsequently becomes inaccurate. In accordance with Regulation AC of the 1934 Exchange Act, the views expressed in this research report accurately reflect the research analysts' personal views about the subject securities or issuers and are subject to change without notice. No part of the research analysts' compensation is related to the specific recommendations or views in the research report.

### 5. Recipients and sales and marketing restrictions

5.1 Nothing in this document should be construed as a solicitation or offer, or recommendation, to acquire or dispose of any investment or to engage in any other transaction, or to provide any investment advice or service.

5.2 This document is directed at Professional Clients and not Retail Clients within the meaning of DFSA rules. Any investments or financial products referred to herein will only be made available to clients who Arqaam is satisfied qualifies as Professional Clients. Any other persons in receipt of this document must not rely upon or otherwise act upon it.

5.3 This document is only being distributed to investors who meet certain qualifications and to whom an investment or service may be offered or promoted in accordance with relevant country restrictions. This excludes the US except for SEC registered broker-dealers (or banks in permissible "broker" or "dealer" capacity) acting on a principal or agency capacity, and major US institutional investors in accordance with SEC Rules 15a-6(a)(2). Details of other relevant country restrictions are set out on our website at <http://www.arqaamcapital.com/english/system/footer/terms-of-use.aspx>. Persons into whose possession this document comes are required to inform themselves about, and observe, such restrictions and should not rely upon or otherwise act upon this document where it is unlawful to make to such person such an offer or invitation or recommendation without compliance with any authorisation, registration or other legal requirements.

### 6. Risk warnings

6.1 Any prices, valuations or forecasts are indicative and are not intended to predict actual results, which may differ substantially from those reflected.

6.2 The value of an investment may go up as well as down. The value of and income from any investment may fluctuate from day to day as a result of changes in relevant economic markets (including, without limitation, foreseeable or unforeseeable changes in interest rates, foreign exchange rates, default rates, prepayment rates, political or financial conditions, etc.).

6.3 Past performance is not indicative of future results. Any opinions, estimates, valuations or projections (target prices and ratings in particular) are inherently imprecise and a matter of judgement. They are statements of opinion and not of fact, based on current expectations, estimates and projections, and rely on beliefs and assumptions. Actual outcomes and returns may differ materially from what is expressed or forecasted. There are no guarantees of future performance.

6.4 Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors.

6.5 This document does not propose to identify or to suggest all of the risks (direct or indirect) which may be associated with the investments and strategies referred to herein.

### 7. Conflict

7.1 Arqaam and its affiliates provide full investment banking services, and they and their directors, officers and employees, may take positions which conflict with the views expressed in this document. Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and our proprietary trading desks that reflect opinions that are contrary to the opinions expressed in this document. Our asset management area, our proprietary trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this document.

7.2 Arqaam may have or seek investment banking or other business relationships for which it will receive compensation from the companies that are the subject of this document.

7.3 Facts and views presented in this document have not been reviewed by, and may not reflect information known to, professionals in other Arqaam business areas, including investment banking personnel.

7.4 Emirates NBD PJSC owns 8.32% of Arqaam.

7.5 This is a commissioned report for which Arqaam Capital has been remunerated.

### 8. No warranty

Arqaam makes no representations or warranties and, to the fullest extent permitted by applicable law, we hereby expressly disclaim any and all express, implied and statutory representations and warranties of any kind, including, without limitation, any warranty as to accuracy, timeliness, completeness, merchantability, fitness for a particular purpose and/or non-infringement.

### 9. No liability

Arqaam will accept no liability in any event including (without limitation) negligence for any damages or loss of any kind, including (without limitation) direct, indirect, incidental, special or consequential damages, expenses or losses arising out of, or in connection with your use or inability to use this document, or in connection with any error, omission, defect, computer virus or system failure, or loss of any profit, goodwill or reputation, even if expressly advised of the possibility of such loss or damages, arising out of or in connection with your use of this document. We do not exclude our duties or liabilities under binding applicable law.

### 10. Copyright and Confidentiality

The entire content of this document is subject to copyright with all rights reserved and the information is private and confidential for your own personal use only. This document and the information contained herein may not be reproduced, distributed, or transmitted to any other person or incorporated in any way into another document or other material without our prior written consent.

### 11. Governing law

English law governs this document and these disclaimers and any dispute in relation thereto shall be exclusively referred to the English Courts.
