Strong IB continues to drive EPS

- We leave our forecasts estimates unchanged, penciling in an EPS growth of 18.9% for FY23e and an EPS CAGR of 15.6% for FY 23-27e, with RoE expanding from 10.5% in FY23 to 14.0% in FY 27e.
- In Q3, the strong performance was supported by deal flow for the IB division, despite surging OpEx and finance expenses. EPS increased by only 1.0% y/y in Q3, as stronger IB performance (2.7x) was offset by i) weaker commercial banking and treasury/proprietary investments (-68% combined) impacted by higher finance expense and ii) higher OpEx. As a result, 9M EPS growth reached 20% y/y (USD 2.26).
- Balance sheet expanded by 8% YtD driven by a continuous surge in deposits (140% YtD), which was largely allocated to the treasury book.
- Maintain BUY as the current valuation at 0.9x P/BV is not pricing in better earnings resilience, RoE expansion, and growing AuM base.

We pencil in an EPS CAGR of 10% for FY23-27e, with RoE expanding from 9% in FY22 to 14% for FY27e. The IB division continues to bolster GFH's performance, especially following Q3 surge (1.7x q/q), though was mostly offset by higher-than-expected OpEx and finance expenses, up by 71% and 25% y/y, respectively. Impairment increased as well by 109% y/y, mainly due to the treasury portfolio. The IB performance was supported by several transactions during Q3 23, including the placement of Saudi Food Logistics, US Opportunistic Fund, US Logistics II, and Student Housing III. As a result, EPS growth was limited to 1% y/y (-21% q/q), lifting 9M EPS by 20% to USD 2.26.

Ambitious targets. GFH plans to grow its asset base and AUM to USD25bn by YE 25e through i) organic growth, via creating strategic PE platforms (i.e., GFH's education investment arm Britus Education) and ii) inorganic growth, via acquiring strategic businesses (i.e., acquisition of Asset Managers to strengthen footprint in the UK, and US). We expect a revenue CAGR FY23-27e of 10.7%, operating profit CAGR of 20.3%, and EPS CAGR of 15.6%, with RoE gradually improving from 9.2% in FY22 to 14.0% in FY27e and RoRWA improving from 1.2% in FY22 to 2.1% in FY27e. While it remains dependent on transactional gains for a significant share of its revenues, however, we see those gains as recurring.

De-risked strategy. GFH cut its real estate portfolio (23.6% of assets in FY 21 to 12.6% in Q2 23A). The group plans to improve return generation by enhancing existing business lines through ii) refocusing on financial assets across the rest of the group, iii) enhancing Khaleej's asset base, iv) expanding treasury operations and investment banking, and v) expanding international footprint.

Expanding asset base supported by a growing deposit base allocated mainly to the treasury portfolio. Asset growth was 8.0% YtD, mainly through higher investments in the treasury portfolio (+18%) and loan book (+9%), funded mainly by an expansion in equity of investment account holders, up by 142% YtD (mainly through financial institution funding). As of Q3, net-debt-to-equity ratio stands at 0.62x vs. 1.09x at YE 22A. GFH targets to grow the AuM base from USD 18.8bn to USD 25bn through organic/inorganic growth.

Surge in stage 2 and 3 loans, though impact remains limited as financing assets make up for 15% of overall assets. Stage 1, 2, and 3 loans make up for 72.0%, 19.4%, and 8.5%, respectively, compared to 85.8%, 9.6%, and 4.6%, at YE 22A. Stage 1, 2, and 3 loans coverage stand at 0.4%, 6.8%, and 29.5%, respectively, compared to 1.4%, 8.4%, and 49.4%, respectively, at YE 22A. The provision deficit widened from USD 7.5m as of YE 22A to 65.5m vs. our standard stress test of 1% coverage on stage 1 loans, 12% on stage 2, and 60% on stage 3. However, the collateral was substantial as of YE 22A, with the average collateral coverage ratio on secured facilities standing at 149.7%. The loan book is well diversified with exposure spread across segments: 31% RE, 24% Others, 15% Manufacturing, 15% Construction, and 14% Trading.

Optimal capital level and liquidity position. GFH operates at optimal capital levels, with T1 and CAR of 14.7% and 15.6%, respectively. Leverage stands at an asset/equity ratio of 10.6x, while net loan/equity is low at 1.6x. GFH reported an NSFR of 106% and an average LCR of 227%. GFH's LT issuer credit rating was raised by S&P Global Ratings to 'B' from 'B-' in FY 22, with a stable outlook.

The current valuation is not pricing in better earnings resilience. The stock trades at 0.9x P/tNAV23e and 9.4x P/E 23e, not recognizing the enhanced focus on RoE, the improved revenue mix, and the limited intangibles on the bank's balance sheet.

3. Rating system

Arqaam investment research is based on the analysis of regional and country economics, industries and company fundamentals. Arqaam company research reflects a long-term (12-month) fair value target for a company or stock. The ratings bands are:

Buy	Total return >15%
Hold	0-15%
Sell	Total return <0%

In certain circumstances, ratings may differ from those implied by a fair value target using the criteria above. Arqaam policy is to maintain up-to-date fair value targets on the companies under its coverage, reflecting any material changes to the analyst's outlook on a company. Share price volatility may cause a stock to move outside the rating range implied by Arqaam's fair value target. Analysts may not necessarily change their ratings if this happens, but are expected to disclose the rationale behind their view to Arqaam clients.
